

## MFJ-1795

### **10/15/20/40 Meter Vertical Antenna for Restricted Areas**

This antenna is PERFECT for permanent or portable operation in antenna restricted areas. You can hide the MFJ-1795 behind trees, fences, buildings, and in bushes! The antenna is only 7 to 10 feet tall (adjustable).

The MFJ-1795 has a low angle of radiation for DXing and is omni-directional. The MFJ-1795 handles 1500 Watts PEP. It has highly efficient end-loading. The entire length of the antenna radiates and it has low SWR.

The MFJ-1795 can be ground mounted with a suitable ground, such as the MFJ-1904 Ground Coupled Antenna Base, or radials or ground rods. You can also roof mount the MFJ-1795 with radials.
