

# THREE BAND ROTATABLE DIPOLE 14, 21 AND 28 MHz

## MODEL TE-13

### Description

The "TET-Emtron TM" model TE-13 is an optimum performance three band rotatable dipole. New high efficiency traps, all stainless steel hardware and rugged aluminium construction guarantee long and trouble-free operation. As trap type antennas are generally considered narrow banded, the TE-13 gives you a SWR of 1.5 or less across the entire operating band, and therefore does not need any readjusting for phone or CW band. This feature is due to uniquely designed dual traps.

The antenna is made from specially hardened aluminium, all predrilled and by following the instructions, you will find that the antenna is simple to assemble.

### Specifications

FREQUENCY	14, 21, 28 MHz band
ELEMENT LENGTH	8.16 m
FEED IMPEDANCE	50 OHM
TURNING RADIUS	8.16 mtr
SWR	1.5 or less
POWER RATING	2 Kw
