

# TET-EMTRON

## TEV-4 4 BAND VERTICAL

40, 20, 15 and 10 meters

### Description

The "TET-Emtron TM" model TEV-4 is an optimum performance four band vertical antenna. A high efficiency trap, all stainless steel hardware and rugged aluminium construction guarantee long and trouble-free operation.

It can be mounted at ground level or elevated to any height above ground or a roof. It comes complete with one resonant set of waterproof radials. As many sets as desired can be added for greater efficiency.

If any tuning within the bands is needed, it is done by adjusting the length of the radials.

The antenna is all predrilled and by following the instructions, you will find that the antenna is simple to assemble and a good performer.

### Specifications

|                |                      |
|----------------|----------------------|
| FREQUENCY      | 7, 14, 21 and 28 MHz |
| ELEMENT HEIGHT | 4150 mm              |
| FEED IMPEDANCE | 50 OHM               |

|                       |             |
|-----------------------|-------------|
| MAXIMUM RADIAL LENGTH | 10.7 Meters |
| SWR                   | 1.5 or less |
| POWER RATING          | 1 Kw PEP    |
